

DOCLOGIX OFFERING FOR MANUFACTURING COMPANIES

DocLogix is a **BIG, affordable document and business process management SOLUTION** for small and medium size manufacturing companies. It is an infrastructure, which perfectly organizes and connects people, departments, and business units through information into one harmonized, productive and efficient, regulations compliant business organism.

WHY SHOULD YOU WASTE YOUR TIME DOING THINGS MANUALLY INSTEAD OF CHOOSING AN ADVANCED DOCUMENT AND PROCESS MANAGEMENT SOLUTION?

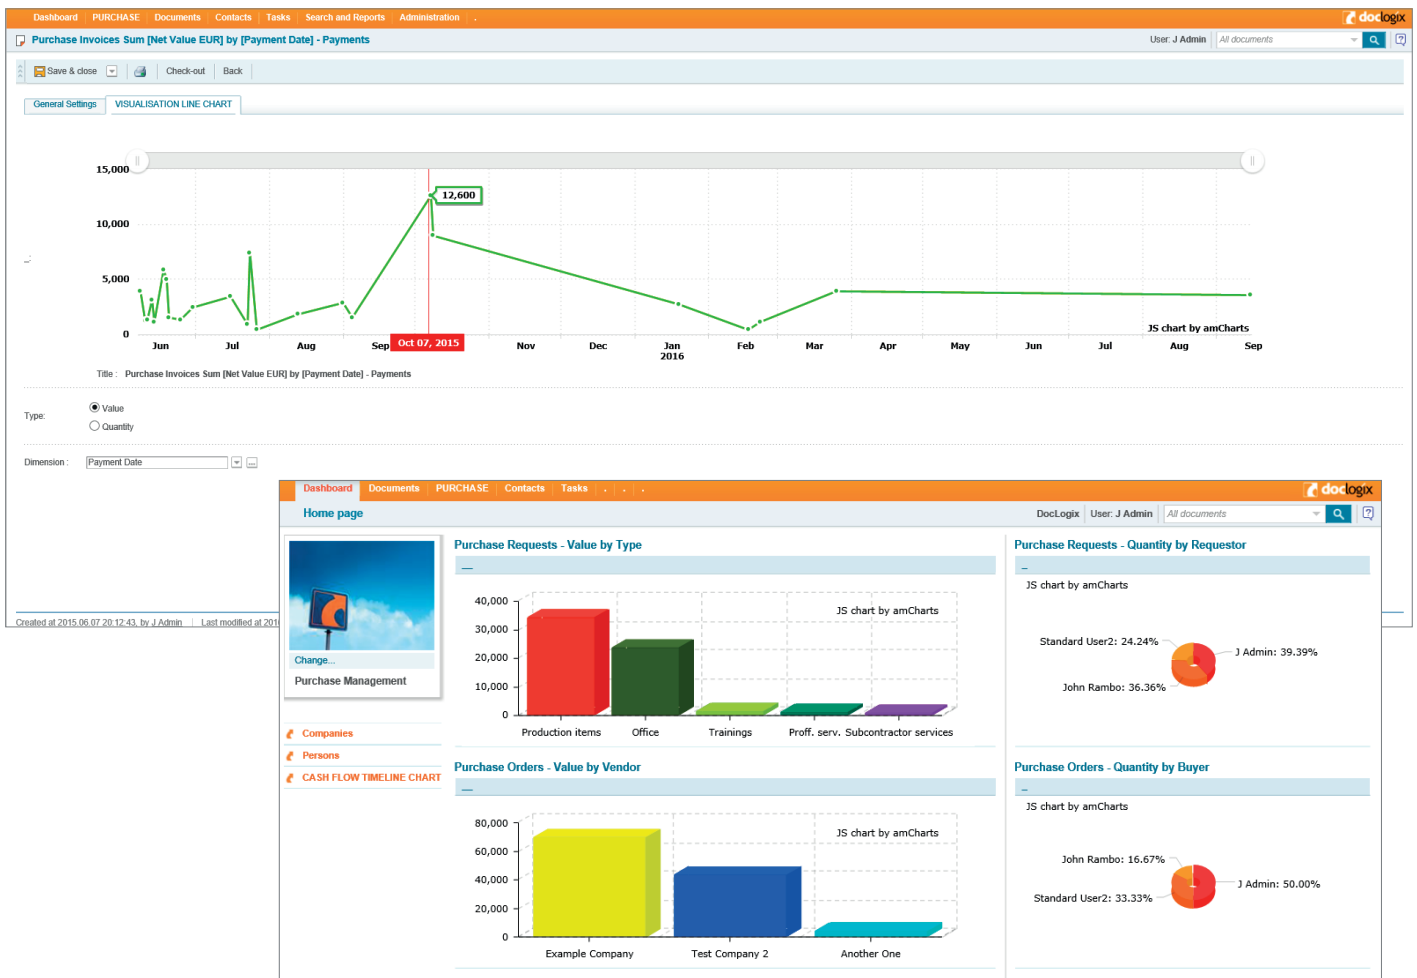

Here at DocLogix we understand that value delivered by manufacturing companies is to not just in the sale of a product, but in all of the related manufacturing processes. The best way to describe it is **QUALITY, RELIABILITY AND SAFETY**. Certainly, it is

possible to gather all preparatory documents manually at every single stage of the manufacturing process. But is it efficient? No. So why should you do things manually instead of choosing an advanced document and process management solution?

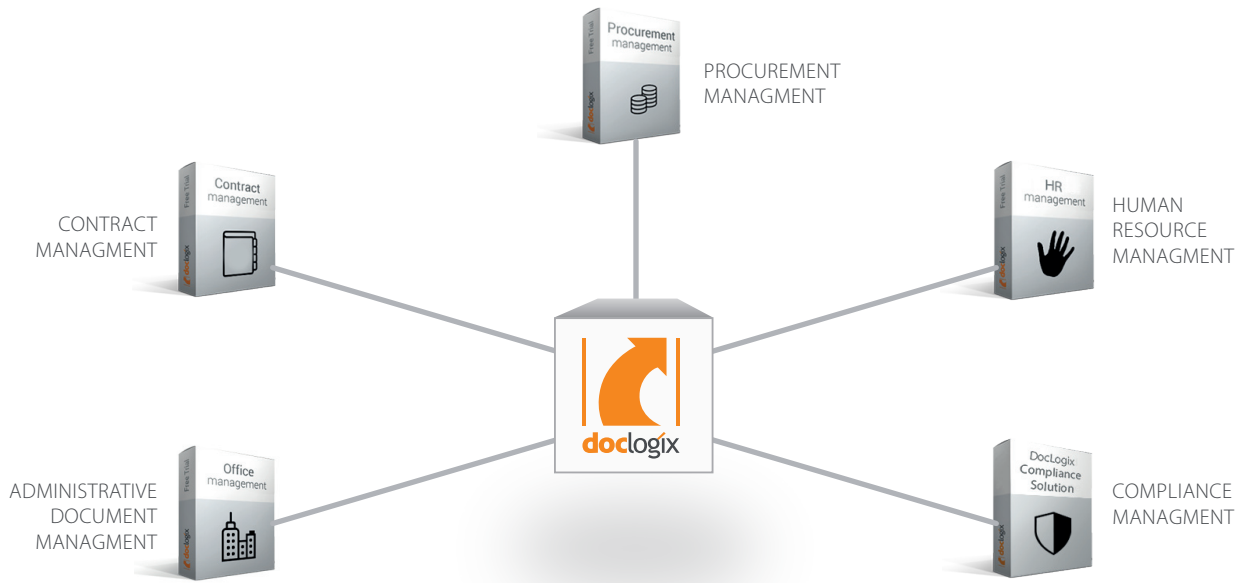

WHY DOCLOGIX?

Because DocLogix is a recognized company-wide document and process management solution with built-in business apps for the optimization of specific business areas. With DocLogix you will no

longer need additional software for time reporting, orders control, equipment management, vendors evaluation and lots of other manufacturing business processes.

DOCLOGIX INCREASES PRODUCTIVITY AND EFFICIENCY, MAINTAINS SAFETY AND COMPLIANCE FOR MANUFACTURING COMPANIES!

MANUFACTURING BUSINESS PROCESSES COVERED BY DOCLOGIX:

- Work order management
- Time reporting
- Cooperation management (subcontractor orders)
- Project documentation management
- Technical documentation management
- Production / Manufacturing
- Equipment management
- Calendar for equipment calibration management
- Inventory management
- Parts catalog management
- CNC program management
- Professional certificates management
- ISO compliance management
- Business Process Indicators management
- Internal Knowledge Base management
- Preventive actions management
- Repair actions management
- Risks management

- Vendor evaluation
- Claim management
- Meeting management

DocLogix is a smart system, which can be easily adapted to meet specific needs of the company.

An intuitive environment is very useful for new app creation or DocLogix integration with other systems. Do you need to automate a specific process? Contact us and we will do it for you on the DocLogix platform!

DocLogix technical differentiation in manufacturing sector.

In addition to ready-to-use business apps, DocLogix is distinguished for connecting, processing and managing not only documents, but any business object (email, order, contract, task, labor unit, contact, machine etc.), enabling smart and efficient overall business operational activities.

For example you will be able to:

- Link standards, regulations and requirements with the existing processes,
- Control work orders, equipment management and monitor employee's work hours,
- Easily manage thousands of documents and create an environment friendly manufacturing company (no more printing costs!).

REFERENCES

"DocLogix appeared to be a powerful platform, yet was still very easy to understand and configure. Our people have already made amazing progress, and all without any programming. We have already configured solutions for the management of meetings, equipment and maintenance management. We knew the

vendor had solutions that were ready to install, but we chose to go down the platform route because of our company's specifications."

Rokas Radziunas,
Process Improvement Manager
at Triple D Bending, Canada

"We aim at the effective management of company documents, digitalising the majority of processes of our operations in a system, and the improvement of the quality management system. The professional attitude of the DocLogix team towards the implementation of the system allowed the achievement of

excellent planned results, and now we receive substantial benefit. The solution was fully adjusted to our needs. Today we use DocLogix for the management of technical documentation, the automation of operational processes, and many other areas."

Grzegorz Beszczyński,
Head of the Quality Management
System at Wrebowa, Europe
